

Krunal Arvind Kurkure

SOFTWARE ENGINEER

Nashik, India | +91 9766610143 | adkurkure@gmail.com | linkedin.com/in/krunal-arvind-kurkure | github.com/Krunal-Kurkure

SUMMARY

Final-year B.Tech (CSE) student (GPA 8.75/10) with experience in developing production-grade web and mobile applications across multiple internships. Proficient in React, React Native, Node.js, Express, MongoDB, and PostgreSQL. Proven expertise in REST API design, JWT authentication, and third-party integrations (Supabase, Google Cloud services). Seeking a Full-Stack or Mobile Developer role to build scalable, high-performance software solutions.

EDUCATION

B. Tech, Computer Science & Engineering — Sandip University, Nashik, Maharashtra

Aug 2022 – Aug 2026 (Expected) | GPA: 8.85/10

Higher Secondary (Class XII) — K. Narkhede Vidyalaya, Bhusawal, Maharashtra.

Mar 2022 | Percentage: 77%

SKILLS

Languages: Java, C++.

Frontend: React.js, React Native, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS.

Backend: Node.js, Express.js, REST APIs, Supabase.

Databases: MySQL, MongoDB.

Design: UI/UX Design, Figma.

EXPERIENCE

Java Development Intern — Internship Studio (Remote)

Aug 2024 – Oct 2024

- Engineered backend microservices in Java refactored SQL queries and indexes to reduce average API response time
- Integrated REST endpoints and documented API contracts in Postman, improving QA handoff and integration speed
- Wrote unit/integration tests (JUnit / Mockito) to raise automated test coverage — added regression checks to CI pipeline

Full-Stack Development Intern — AICTE (Remote)

Jul 2024 – Aug 2024

- Implemented frontend authentication flows with React and JWT-based backend authentication in Node.js/Express, achieving secure login and session management
- Integrated CRUD REST APIs and optimized database schema for user and course data, reducing average DB read latency
- Integrated role-based UI and client-side validations to improve user experience and reduce invalid submissions

PROJECTS

E-learning Platform (MERN Stack)

- Designed full-stack platform with React, Node.js, Express, and MongoDB supporting user registration, course enrolment, and progress tracking
- Designed responsive UI for course navigation and implemented APIs for course CRUD, search, and progress analytics
- Wrote Postman collections for API validation and automated API tests

Uber Clone (MERN Stack)

- Built a full-stack ride-hailing application using MongoDB, Express, React, and Node.js
- Implemented JWT-based authentication for secure user and driver access
- Developed RESTful APIs for ride booking, driver matching, and trip management
- Architected a responsive frontend with real-time ride status updates

K-Beats (React Native)

- Built a music player app enabling users to import downloaded song files and enjoy offline playback anytime
- Developed music management features including playlists, artist-based playlists, and edit, update, or delete song details
- Integrated fast search, lyrics editing for tracks, editable song cover and metadata and full control over personal music data
- Implemented advanced playback features such as background play, notification controls, and song trimming functionality

CERTIFICATIONS

Data Structures & Algorithms using C and C++ — Udemy, Feb 2024.

Complete Web Development — Udemy, Dec 2024.
